1 : 285 (6mm)

1 : 144 (10mm)

PHOTOPAPER foldable MODEL SET BTB02

An easier and cleaner fold can be achieved by lightly pressing the fold lines (the lines between notches - - -) with a pen or a bodkin prior to folding.

1 Try your tool on testing area.

Use the scissors or a hobby knife and a metal ruler to carefully cut out the building's sections. Bend and glue tabs or use double-sided scotch tape instead of glue.

2

3 Bend and insert the rooftop segment into „house box“.

3

The basis model is ready. If necessary, paint over joints and fold lines by a gray felt-tip pen.

4

5 Cut, fold and glue the rooftop bulkheads.

5

6 Mount the rooftop bulkheads.
